

C6727 EVM

Evaluation module for newest high performance floating point DSP TMS320C6727

- TI TMS320C6727 DSP at 300 MHz.
- AIC23 stereo codec
- SDRAM 128MB
- FLASH 4 Megabit (512k x 8-Bit or 256k x 16-Bit selectable)
- 4 x pushbuttons and 4 x LEDs for user's application
- High and low voltage input and output headphone plugs
- JTAG connector
- Connectors for memory interface expansion
- Boot options selectable via DIP switches
- Connectors for UHPI or expansion for low cost USB-connector-card via UHPI
- +5V single voltage power supply
